Typing Made Easy

The typing tutor used by Fortune 500 companies.

Lesson 8 - Practice Paragraphs

TYPING MADE EASY keeps track of your slowest fingers and drills you automatically to increase your overall skill.

Progress for Andrea Gilbert Speed for each key

TYPING MADE EASY provides analysis of each finger's strengths and weaknesses. Easy-to-read graphic displays allow you to keep track of your progress.

Typing. Whether you are using a typewriter for letters, or a computer for word processing or even a spreadsheet, you have to be able to type. Unfortunately, most typing programs use foolish games to teach typing. Until now.

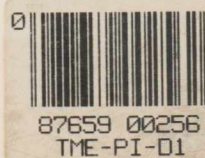

TYPING MADE EASY works because it uses proven methods. From the beginning you use the keyboard, starting with simple drills and progressing to more difficult exercises. Your progress is recorded for each drill so you can measure your steady day-to-day improvement. The progress reports show your "weak" keys or fingers. The program then automatically analyzes your progress and adjusts the drills to give you extra practice where you need it.

This breakthrough makes TYPING MADE EASY the standard in typing programs. This is why it is used by more Fortune 500 companies than any other typing tutorial.

With TYPING MADE EASY your productivity will improve dramatically in just three weeks. It lets you work faster and more efficiently.

TYPING MADE EASY includes the following outstanding features and benefits:

- Teaches "touch typing" - typing without looking at the keys.
- An entirely self-teaching approach, with lessons that progress at the user's own pace.
- Individualized progress reports on speed and accuracy highlight the fingers and keys that need extra practice.
- Drills slow fingers and problem keys.
